SUMMARY

Data and business professional with 3+ years of experience leveraging SQL, Python, and BI tools to analyze large-scale datasets and drive operational decision-making in higher education. Proven track record of transforming manual processes into scalable data solutions, improving data accessibility, and enabling stakeholders to make faster, more confident decisions.

Combines strong technical execution with a systems mindset—focusing not just on answering questions, but improving the underlying data structures and workflows that power them.

DATA & ANALYTICS SKILLS

- **Languages & Tools:** SQL (Databricks, PostgreSQL, MySQL), Python (Pandas, NumPy, Scikit-learn), dbt (learning), Tableau, Excel
- **Data Techniques:** Joins, CTEs, Window Functions, Aggregations, Data Validation, Data Transformation
- **Analytics:** Exploratory Data Analysis, Reporting Automation, Dashboard Development, Statistical Analysis
- **Data Systems:** LMS Data (Canvas Data 2), Scheduled Reporting, Data Pipeline Monitoring, Data Quality Analysis
- **Other:** Stakeholder Communication, Requirements Gathering, Process Optimization

PROFESSIONAL EXPERIENCE

Florida State University (FSU)

Business Analyst (Data-Focused) – Office of Digital Learning & Academic Technology

Oct 2022 - Present | Tallahassee, FL

- Query and analyze large-scale academic and LMS datasets (15,000+ student records) using SQL (Databricks, PostgreSQL) to support operational and academic decision-making
- Built and optimized SQL workflows that reduced a manual Excel reporting process from 2 hours to 5 minutes, improving efficiency and data reliability
- Owned development and maintenance of scheduled reports sourced from Canvas Data 2, ensuring stakeholders had timely and accurate access to key metrics
- Designed dynamic queries using joins, CTEs, and window functions to support recurring and ad-hoc analysis across academic programs
- Identified and investigated data pipeline delays by comparing full vs. filtered dataset outputs, improving data quality and trust in reporting systems
- Analyzed Florida Civic Literacy Test data and transformed outputs into upload-ready formats for state systems, eliminating manual rework for the Registrar's Office

- Partnered with cross-functional stakeholders to define reporting needs, validate data accuracy, and deliver actionable insights
- Created Tableau dashboards and Excel-based reporting tools to support decision-making across academic and administrative teams
- Proactively identified process inefficiencies and data inconsistencies, implementing scalable SQL-based solutions to improve reporting accuracy and maintainability
- Contributed to university-wide AI initiatives, including development of responsible use guidelines, rollout support for AI tools, and creation of documentation to improve accessibility and adoption

TDS Telecommunications

Software Engineer I

Jun 2021 - Jun 2022 | Remote

- Wrote SQL queries to support reporting, validation, and operational analysis for billing and revenue systems
- Generated custom reports to fill gaps in existing tools, enabling stakeholders to access previously unavailable data insights
- Performed data validation and database updates to ensure accuracy and consistency across systems
- Collaborated cross-functionally to support data-related project deliverables and system enhancements
- Improved internal documentation to make technical and data processes more accessible across teams

EDUCATION

Master of Science, Data Analytics

Western Governors University – 2025

Bachelor of Arts, Anthropology

Northern Illinois University - 2016

CERTIFICATIONS

- Google Data Analytics Professional Certificate
- Udacity SQL Nanodegree
